

## Your COVID-19 test result

# POSITIVE

A positive result for this test means that SARS-CoV-2 RNA (the cause of COVID-19) was detected in the collection sample.

### What does it mean to have a **positive** test result?

If you have a positive test result, it is likely you have COVID-19. Therefore, it is also likely that you may be placed in isolation to avoid spreading the virus to others. There is a very small chance that this test can give a positive result that is wrong (a false positive result). Most cases can be cared for at home. Stay home and limit contact with others until:

You have been fever free for at least 3 days without using medicine that reduced fever **AND** your symptoms have improved **AND** at least 10 days have passed since your symptoms first appeared.

- Do not go to the hospital to seek care unless you have a medical emergency
- Do not go to work, notify your employer of your positive test result
- Contact your primary care provider and inform them of your positive COVID-19 test result
- Continue to monitor your symptoms at home and seek medical attention if symptoms worsen

### Test information

**Patient's name**

Shreyas Srinivasa

**Collection date**

April 23, 2023 at 10:23 AM CT

**Patient's date of birth**

May 20, 2000

**Collection location**

418 W VALLEY AVE,  
HOMWOOD, AL 35209

**Test type**

SARS-COV-2 RNA, QL, RT PCR (COVID-19)

**Provider**

WEAVER DEANNA

### Contact information

**Customer Service:** (886) 389-2727

## Legal Disclaimer

Performed at: 01 - LabCorp Birmingham 5005 S 40th Street Ste 1200, Lab Director: Earle Collum MD, Phone: 8007889743 This nucleic acid amplification test was developed and its performance characteristics determined by LabCorp Laboratories. Nucleic acid amplification tests include PCR and TMA. This test has not been FDA cleared or approved. This test has been authorized by FDA under an Emergency Use Authorization (EUA). This test is only authorized for the duration of time the declaration that circumstances exist justifying the authorization of the emergency use of in vitro diagnostic tests for detection of SARS-CoV-2 virus and/or diagnosis of COVID-19 infection under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(b) (1), unless the authorization is terminated or revoked sooner. When diagnostic testing is negative, the possibility of a false negative result should be considered in the context of a patient's recent exposures and the presence of clinical signs and symptoms consistent with COVID-19. An individual without symptoms of COVID-19 and who is not shedding SARS- CoV-2 virus would expect to have a negative (not detected) result in this assay.
